C Street, Water Main
REPLACEMENT PROJECT

April 2027

Project Particulars

The City of Sergeant Bluff is continuing to make improvements with an upcoming construction project on C Street from 1st to 8th, 8th Street from B to D, 2nd street from C to D, and portions of West Ridge Road. The design of the project is currently underway, and construction is anticipated to begin in Spring/Summer 2027.

The project involves replacing the certain outdated 4" and 6" watermains with a new 8" watermain in the Old Town residential neighborhood. Additionally, water service lines that contain lead or galvanized pipe within the existing right of way will be replaced. The project also includes street patching and sidewalk repairs to accommodate the water main installation.

We understand this project will have an impact on your daily routines, and your patience will be greatly appreciated. Questions regarding the proposed construction or any special access requirements can be addressed to John Robinson, City of Sergeant Bluff, by phone or email listed at the bottom.

PROJECT DESIGN & ANTICIPATED CONSTRUCTION SCHEDULE 2026/2027

- **November 5, 2026, from 5:30-6:30pm Public Information Meeting Community Center, Fireside Room**
- Late December 2026 – Council Sets Bid Date
- December 2026 – Bid Out Project
- January 2027 – Award Contract to Contractor
- April 2027 – Construction starts

See other side for proposed Project Limits

IMPACTS OF CONSTRUCTION

There will be temporary inconveniences, access to driveways being limited or not accessible, and temporary water service shutdowns.

Garbage & Recycling

If your garbage is picked up on the street, the Contractor will pick up garbage and recyclables at the location it is currently picked up today (end of each driveway) according to the current schedule and transport it to a central collection location.

Lead Water Services

Under the U.S. EPA Safe Drinking Water Act, this project cannot connect to existing lead water service lines or galvanized lines downstream of lead. Known lead service lines within the project area will be fully replaced from the water main to the property's water meter. The contractor will coordinate with property owners to access the meter and complete the replacement. If you are aware of any galvanized or lead water pipes within your residential property, please contact our Water Plant Operator, Jesse Hansen, at 712-943-2977.
